

TO WHOM IT MAY CONCERN:

INSTALLATION ON RADIANT HEATED FLOORS

We hereby confirm the validity of the Karelia Warranty as printed in the warranty terms. The warranty covers Karelia flooring installations over “Radiant Heated Floors” when installation conforms to the specific instruction laid out by Karelia Hardwood Floors, Kuopio Finland. Installation instructions can be found on the internet at www.kareliafloors.com.

The Karelia warranty is hereby valid for both floating and glue-down installations. Radiant floor heating installations can be either hot water-, or electrical-systems.

Beech, Jatoba, and Maple react more intensely to variations in humidity than other wood species, causing possible cracking and extended contraction and expansion, visible as buckling, or gapping. We therefore do NOT warrant these species if installed on top of radiant heated flooring systems.

Warranty is at all times contingent upon strictly following specific Karelia installation instructions for Radiant Heated Floors.
